

TIMBER VENETIAN
BLIND SYSTEM

MOTORISED	2.4
ULTRAWOOD	2.9

Vertilux Timber Venetian Blinds offer an innovative blend of classic style and state of the art engineering; ushering in a new era for this time-honoured traditional window covering. Precision engineered components effortlessly regulate light, glare and provide excellent insulation in both summer and winter.

Vertilux Timber Venetian Blinds complement contemporary as well as period and heritage styles, adding warmth and natural texture to any interior space.

Easy to operate, they offer a subtle design flow of fresh, clean lines for efficient light control; lending themselves perfectly to motorisation for ease of use and can be operated via remote control. Perfect for situations where many blinds need to be tilted, raised or lowered at the same time and can be programmed at specific times for total light control.

Ultrawood 2.0 is our newest highest-performing, most sustainable timber venetian range yet. The expanded Wood Fibre Polystyrene Composite can withstand temperatures up to 65 degrees Celsius without bending or losing integrity. Ultrawood does not absorb moisture making it highly suitable for wet and humid areas including kitchens and bathrooms.

Vertilux offers a wide range of shape options for the full range of Venetian Blinds, such as skylights, caravans and Cathedral shaped windows. We can also tailor Venetian Blinds to your particular windows from a template.

AVAILABLE SYSTEMS	MAXIMUM DROP	MANUAL				MOTORISED	
		MINIMUM WIDTH (STD CONTROLS)	MINIMUM WIDTH (SPLIT CONTROLS)	MINIMUM WIDTH (CENTRE TILT)	MAXIMUM WIDTH	MINIMUM WIDTH	MAXIMUM WIDTH
50mm Ultrawood 2.0	3000mm	450mm	300mm	200mm	2900mm*	650mm	2900mm
