DOUBLE GLAZED	2.7
VENETIAN SHAPE & CONTROL TYPES	2.8

Vertilux *Aluminium Venetian Blind Systems* offer classic yet functional style with a range of options that makes them not only versatile but efficient in regulating light, glare and UV penetration.

Vertilux Aluminium Venetian Blinds provide a sleek, modern, stylish and affordable solution to your window and are available in a wide range of durable materials, fashionable colours and styles to choose from so you're sure to find a look to compliment any décor.

Our unique Easytilt mechanism makes adjusting manual blinds a breeze with 25mm blades. With just two and a half turns of the wand the blind can go from fully opened to fully closed. Whereas the Easytilt 25mm Midnighter has the ladder holes punched towards the back of the slat together with a 7mm overlap to conceal the ladder hole, offering the ultimate in light control.

Alternatively, our 25mm Monocommand 2.2 Venetian System allows a single chain to control all of the blind's functions: opening, closing, raising and lowering.

Combining your Aluminium Venetian Blind Systems with motorisation adds a level of ease and convenience and with no cords to be concerned with is perfect for those hard-to-reach applications. They can be operated via remote control or pre-programmed to operate at desired times.

We can also tailor Aluminium Venetian Blinds to your particular windows from a template and manufacture to a wide range of shape options such as skylights, caravans and cathedral shaped windows. Lastly, all of our Venetian Systems come with colour coordinated accessories and are designed to compact neatly, reducing stacking-bulk, when not in use.

AVAILABLE SYSTEMS	MINIMUM WIDTH (FIXED)	MINIMUM WIDTH (CENTRE TILT)	MINIMUM WIDTH (SPLIT CONTROLS)	MINIMUM WIDTH (C'LOCK + TILT)	MINIMUM WIDTH (STD CONTROLS)	MAXIMUM WIDTH	MAXIMUM DROP
