

PLEATED BLIND SYSTEMS

PLEATED SYSTEM	3.1
EASYRISE PLEATED SYSTEM	3.2
MOTORISED PLEATED SYSTEM	3.3

*Vertilux **Pleated Blind Systems** offer a striking combination of great aesthetics, good value and convenient operation. Infinitely adaptable, both in screen density and shape, meeting unique design requirements including arched, circular, triangular and asymmetric applications.*

Pleated Blind fabrics are a single layer of fabric giving superior heat reflection properties to assist in maintaining an energy efficient and comfortable living environment.

Available in a wide range of colours and textures, including transparent, translucent and metallised options and include colour coordinated extruded aluminium headrails, base rails and associated componentry such as control cords.

The Vertilux Easyrise Pleated System is operated by a single continuous loop chain instead of cords. Our Day Nighter system allows a combination of fabrics to suit almost any light control or privacy requirement. Each application can be lifted from either the bottom or the top so as to admit or block light whilst maintaining high levels of privacy.

Additionally, our Vertilux Motorised Pleated System uses the latest in technology options, making their operation simple, reliable and durable. The ability to motorise these blinds make them particularly suited to skylights and difficult to reach places.

TECHNICAL DATA

AVAILABLE SYSTEMS	MINIMUM WIDTH	MAXIMUM WIDTH	MINIMUM DROP	MAXIMUM DROP
PLEATED 3.1	200mm	5800mm	400mm	6000mm
CORDLOOP PLEATED 3.2	350mm	4000mm	400mm	5000mm
MOTORISED PLEATED 3.3	700mm	5800mm	400mm	6000mm
