SHEERVIEW
BLIND SYSTEM

SHEERVIEW | 6.1

The Vertilux *Sheerview*® Blind System combines both Venetian and Roller Blind in one, making it one of the most versatile and innovative window covering systems for both residential and commercial settings.

Enjoy the benefits of natural daylight in your home with our Sheerview® Blind System that allows you to see out, without being seen. The unique sheer sunscreen fabric is designed to eliminate glare, reflect UV rays and diffuse light while providing excellent daytime visibility.

Made from 100% polyester our Sheerview® Blinds are made up of two layers of sheer fabric, separated by a series of soft vanes. For the ultimate in convenience and style, you can add a motorised system to your Sheerview® blinds which can then be controlled at the touch of a button.

These fabrics are designed to meet stringent standards in light control, glare reduction and insulation from harmful UV rays. Their superior heat reflection properties can assist in maintaining an energy-efficient and comfortable living environment all year round.

Not only do you have the choice of Transparent or Room Darkening fabrics but our stylish range of contemporary colours will suit most decors.

MOTORISATION

Combining your Vertilux Sheerline® Blind System with motorisation adds a level of ease and convenience with the touch of a single button. Your entire house can be synced to a single remote control and automated to open and close at pre-designated times.

So even when you're not at home, your blinds can move up and down to help reduce solar heating during the summer and heat loss during the winter as well as making your home less of a target for burglars.
