## Microsoft Experience Centre

www.vertilux.com.au

### Overview

---

Location: Pitt Street Mall, Sydney  
Distributor: Artech Blinds  
Product: OneBlinds  
System: Motorised  
Qty: 6

*"In the heart of Sydney's iconic Pitt Street Mall, the Microsoft Experience Centre emerges as a beacon of technological innovation and design excellence. The installation of motorised Oneblinds perfectly complemented the center's futuristic ambiance."*

### Objective

To provide a blind system to compliment the minimalist design objective, wide window spans, and seamlessly integrate into the existing architecture without hindering the panoramic views.

### The Solution

At the Microsoft Experience Centre in Sydney, the choice of motorised OneBlinds was a strategic decision to harmonise technology with design. Motorised OneBlinds were seamlessly integrated into the building's automation system to provide light optimisation when demonstrating their cutting-edge technologies.

Offering a clear advantage to the standard option of multiple blinds, OneBlinds' capability of spanning up to 12 metres with no fabric splits enable precise control over light and privacy, as well as aligning seamlessly with the futuristic ambiance of the Experience Centre. The motorised functionality adds an extra layer of sophistication, elevating the overall technological immersion and user experience.
