The Ritz Carlton Perth

www.vertilux.com.au

Overview

Location:	Perth, WA
Architect:	Cottee Parker Architects
Product:	Roller Blinds, Roman Blinds
System:	Motorised
Qty:	2665

"The six-star Ritz-Carlton Hotel evokes timeless luxury and elegance. Reshaped and redefined the city, it has become the Centrepiece of Perth's most prestigious waterside precinct."

Objective

To integrate a blind system that compliments the interior design, and effortlessly blend luxury with comfort. Provide effective light control and glare reduction for optimal lighting conditions. Ensure durability and ease of maintenance for long-term use.

The Solution

2550 Double Motorised Unilink Roller Blinds with 50mm Side Channels for the Guest Rooms, 92 Motorised Roman Blinds and 23 Motorised Fully Enclosed Cassette Roller Blinds with 50mm Side Channels in EcoPelmet were integrated to existing interior design, enhance convenience and ease of use. These blinds can be controlled remotely allowing consumers to adjust the lighting conditions with just a touch of a button.

A combination of Euroview and Ocean Room Darkening fabrics as the chosen fabrics. Euroview® is a transparent fabric that allows protection without blocking your view, while Ocean fabrics do not allow light into the room, giving total privacy. Both fabrics boasting superior heat and reflection properties which assist in maintaining an energy efficient environment.
