Overview

Location: The Rocks, Sydney
Architect: Bar Studio
Product: Roman Blinds
System: Motorised
Qty: 688

“Roman Blinds were chosen to enhance the guest experience at Park Hyatt Sydney, offering unparalleled light control and privacy while perfectly framing the iconic views of Sydney Harbour and the Opera House.”

Objective

The primary objective of the Park Hyatt Sydney redesign was to seamlessly integrate the hotel's interior and exterior spaces, enhancing the guest experience by framing the iconic views of Sydney Harbour and the Opera House. The redesign sought to convey a sense of place while maintaining the hotel's hallmark of understated luxury.

The Solution

For the Park Hyatt Sydney, the installation of 688 motorised Roman Blinds in our Euroview Fabric Range, colour white, was instrumental in achieving the redesign's goals. These Motorised Blinds not only provide guests with precise control over natural light and privacy but also complement the hotel's refined aesthetic.

The Roman Blinds in this project play crucial role in framing the spectacular views of Sydney, reinforcing the connection between the interior spaces and the breathtaking surroundings. They are also an effective and cost efficient alternative in providing insulation against varying temperatures, as well as sound, and included a fabric covered headrail to deliver a clean, stylish finish.
