Qty: 481 Roller Blinds  
29 Roman Blinds

*“Motorised Window Coverings were designed to create a highly immersive experience by enhancing privacy, optimising light control, and elevating the overall atmosphere in both guest rooms and dining spaces”*

## Objective

The primary objective of the Conrad Centennial Hotel refurbishment was to foster a connection between guests and the surrounding community by creating immersive experiences. This was achieved by modernising guest accommodations and dining spaces with high-quality, motorised window coverings that enhance privacy, optimise light control, and elevate the overall guest experience.

## The Solution

The project sought to integrate these solutions seamlessly into the hotel's existing design, ensuring both functionality and aesthetic consistency across the property.

Guest comfort and aesthetic appeal was achieved through the strategic implementation of advanced window covering solutions. Vertilux provided 481 Motorised Multilinked Roller Blinds featuring our Lustre Fabric Range in the colour, Ivory, for the hotel rooms, offering guests refined light control and privacy. Additionally, 29 Motorised Roman Blinds were custom-made for the Hotel's Restaurant using fabric supplied by the customer, seamlessly integrating with the venue's design and ensuring a cohesive and luxurious atmosphere throughout the property.
