Qty: 268

"A thoughtful selection of Motorised Blind Systems were installed at the Burbury Hotel & Apartments to combine style with practicality, enhancing the interior's elegance while providing excellent control over light and privacy."

Objective

Conceived for the corporate market, this hotel is aimed at corporate travellers who are visiting Parliament, and the intention was to create an environment that is timeless and grown up, using classic design and a straightforward palette.

The Solution

For this landmark address, the installation of over 400 Motorised Blinds, including Aluminium Venetian Blinds, Custom Cedar Venetians, as well as Roller Blinds with Kasset Headbox and Side Channels to eliminate light, was a meticulous effort in harmonising functionality with contemporary aesthetics. Each blind was carefully selected and automated to enhance the building's luxurious interior while offering optimal control over natural light and privacy.

This integrated solution not only fulfilled the design objectives but added to the visual appeal of the hotel to ensure a comfortable, adaptable environment for guests, embodying the sophistication and elegance that the Burbury Hotel & Apartments are known for.
