Overview

Location:	Gordon Street, Perth	"Dark Timber Venetian Blinds were the perfect choice for the Gordon Street Garage redesign, adding a touch of rustic charm while enhancing the modern, industrial aesthetic of this unique venue."
Architect:	Foolscap Studio / Design Theory	
Product:	Timber Venetian Blinds	
System:	Manual	
Qty:	2	

Objective

The venue had been highly successful but, after 4 years of operation, the long-table section in the front wing had become under-utilised. They needed a design intervention that was sensitive to the existing-garage theme and would make the space more usable and enticing to an all-day crowd.

The Solution

For the Gordon Street Garage redesign in Perth, dark Timber Venetian Blinds were carefully selected to complement the venue's rustic yet modern aesthetic. These blinds not only filter natural light but also enhance the space's clean lines and warm, earthy tones.

Design Theory's redesign in 2020 included nostalgic elements such as jarrah dado railings and handcrafted leather banquettes, paired with green and tan leather booth seats reminiscent of classic car interiors. The combination of these features with the beautiful spotted gum timber tables and exposed Oregon ceiling contributed to a cohesive, inviting environment.
