Overview

Location: Southbank, Melbourne
Architect: Grant Cheyne
Product: Cedar Venetian Blinds
System: Motorised
Qty: 35

“Our Motorised Cedar Venetian Blinds at Rockpool Bar & Grill in Melbourne were instrumental in creating an intimate, luxurious ambiance, offering precise light control that perfectly complemented the Restaurant’s Design Brief.”

Objective

The relocation of the iconic Sydney restaurant Rockpool to Melbourne aimed to fulfill chef Neil Perry’s succinct brief to designer Grant Cheyne: “make it dark and sexy.” The design objective extended across four private dining rooms, ensuring an unparalleled dining experience for bespoke gatherings of all kinds, while maintaining the signature allure of the Rockpool brand.

The Solution

To achieve the dark and seductive ambiance that chef Neil Perry envisioned for Rockpool Melbourne, our solution included the installation of Motorised Cedar Venetian Blinds. These blinds were chosen not only for their luxurious and timeless appearance but also for their ability to provide precise light control.

The motorisation added a layer of convenience and sophistication, seamlessly blending with the restaurant’s elegant interior. This thoughtful integration of style and function ensured that the dining experience remained intimate and immersive, perfectly aligning with the “dark and sexy” design brief.
