“Motorised Black Timber Venetian Blinds at il Lido’s Italian Canteen in Cottesloe perfectly blended classic elegance with modern convenience, enhancing the dining ambiance with just a touch of a button..”

Objective

The objective for the il Lido Italian Canteen in Cottesloe was to enhance the dining experience by seamlessly blending modern functionality with the venue’s classic Italian aesthetic. This was achieved by incorporating motorised window coverings that would allow precise control over light and privacy, without compromising the restaurant’s ambience.

The Solution

Black Timber Venetian Blinds with motorisation was chosen for the Italian-inspired espresso bar and restaurant. Motorisation added a modern touch to time-honoured traditional window covering, allowing staff to easily adjust the lighting to suit different times of day and dining atmospheres.

Additionally, the sleek black finish of the blinds complemented the restaurant’s stylish interiors, while the automated functionality ensured a seamless integration of convenience and design. The final result perfectly mirrors the produce of il Lido itself – cool and casual yet with an immense depth of colour and flavour.
