## GLOBAL GREEN TAG INTERNATIONAL

# Vertilux Corporation Pty Ltd Chanell<sup>®</sup> Eco Translucent

Vertilux's Chanell<sup>®</sup> Eco Translucent is high quality 100% Trevira CS ECO fabric with flame retardancy property. Chanell Eco Translucent is designed with its plain linen style waves, which gives a modern look to any environment and allows light to be filtered into a room where privacy is required yet total blockout is unnecessary.

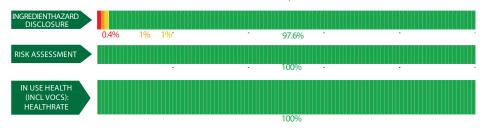

Chanell<sup>®</sup> Eco Translucent Products/Ranges: **Product Stages Assessed:** Whole of life +re-use potential Blinds **Product Type: CSI** Masterformat: 12 21 23 Roll-Down Blinds Licenced Site/s: Stammbach Germany Licence Number: VER:EC03:2021:PH Licence Date: 26 May 2022 Valid To: 26 May 2025 Standard: GGT International v4.0 Screening Date: 12 January 2022 PHD URL: https://www.globalgreentag.com/certificate/1057/

See over for explanation.

ASSESSMENT:

Declared by: Global GreenTag International Pty Ltd

David Baggs CEO & Program Director Verified compliant with: ISO 14024 & ISO 17065

#### 1.0 Scope

The Global GreenTag International (GGT) Product Health Declaration (PHD) has been designed to provide an additional level of service to the green product sector in facilitating an easier understanding of both the hazard and risk associated with any certified products and is intended to indicate:

- Chemical hazards of both finished product and unique ingredients to a minimum level of 100ppm for final product throughout the product life cycle, (including any VOC or other gaseous emissions);
- An assessment of exposure or risk associated with ingredient handling, product use, and disposal in relation to established mitigation and management processes;

It is not intended to assess:

- i. substances used or created during the manufacturing process unless they remain in the final product; or
- ii. substances created after the product is delivered for end use (e.g., if the product unusually degrades, combusts or otherwise changes chemical composition).

GGT PHDs are only issued to products that have passed GGT Standards' certification requirements. The Level of Assessment (BronzeHEALTH, SilverHEALTH GoldHEALTH or PlatinumHEALTH) rating relates ONLY to GGT Standard Sustainability Assessment Criteria 3, and is declared separately to the overall Bronze, Silver Gold or Platinum Green Tag Certification Mark Tier Levels.

#### 1.2 Preparing an PHD

GGT PHDs are prepared using Hazard Classifications from the UN Globally Harmonised System of Classification and Labelling of Chemicals (GHS) and as an outcome of a successful Application for Certification. Assessments are undertaken by GGT Qualified Exemplar Global Lead Auditors and subsequently accepted for Certification by the GGT Program Director (also a Qualified Exemplar Global Lead Auditor) under the Personal Products Standard v1.0/1.1, and Cleaning Products Standard v1.1/1.2 and above Program Rules.

#### 1.3 External Peer Review

Every GGT PHD is independently peer reviewed by an external Consultant Toxicologist and Member of the Australian College of Toxicology & Risk Assessment.

### 2.0 Declaration of Ingredients

Where a manufacturer wishes recognition under a rating program that requires transparency of ingredients such as LEED v4.0 & v4.1, WELL v1 & v2, Living Building Challenge, Estidama etc., the following information is declared from audit:

| Colour   | Ingredient Name  |
|----------|--|
| Green    | Ideal- Low<br>No concerns- ingredient safe at any level based on current known science, % of the ingredient, and relevance to use<br>context'  |
| Yellow   | Medium to Low<br>Hazardous Ingredient with minor level of "Issue of Concern" depending on % of the ingredient, hazard level, and relevance<br>to use context'                                  |
| Orange   | Moderate<br>Hazardous ingredient with "Issue of Concern" or "Issue of Concern Minimised" depending on % of the ingredient, hazard<br>level, and relevance to use context'                      |
| Red      | Problematic (Red): Target for Phase<br>Hazardous ingredient with 'Red Light" or "Red Light Minimised" concern depending on % of the ingredient, hazard level,<br>and relevance to use context' |
| Dark Red | Very Problematic (Dark Red): Target for Phase<br>Very Hazardous ingredient with 'Red Light Exclusion" concern depending on % of the ingredient, hazard level, and relevance<br>to use context' |
| Grey     | Uncategorised<br>Not able to be categorised due to lack of toxicity impact information.  |
| Black    | Banned Ingredients<br>Petroleum, Parabens plus a wide range of compounds stipulated by cleaning/personal products standards.   |

Global GreenTag International Pty Ltd (Global GreenTag) is not a medical professional organisation. Global GreenTag does not purport to provide medical advice, and makes no warranty, representation, or guarantee regarding the declaration that it provides in relation to any allergies, chemical sensitivities or any other medical condition, nor does Global GreenTag assume any liability whatsoever arising out of the application or use of any product or piece of equipment that has been chemically assessed by Global GreenTag.

The chemical assessments carried out provide transparent information peer reviewed by a consultant toxicologist regarding the chemical make-up and ingredients of certain materials and products, but such assessments are not to be taken as any form of medical assessment or health advice and are not targeted towards providing specific solutions to allergenic conditions or any other type of medical concerns.

Users must carry out their own investigations if they are concerned about specific medical conditions and the impact of certain products or ingredients in relation to specific medical concerns.

Global GreenTag takes no responsibility and is not liable in any way with respect to any medical or health issues arising from a person's use of materials or products that have been chemically assessed by Global GreenTag. Global GreenTag shall not be liable for any direct, indirect, punitive, incidental, special or consequential damages to property or life whatsoever, arising out of or connected with the use or misuse of any materials or products that have been assessed by Global GreenTag.

\* No GHS H-Statement classification

#### Comments:

VOC emissions: Formaldehyde emission of <0.005 mg/m3/hr for product applied on site is <0.1 mg/m3/hr measured using test method for ASTM D5116- 2017 "Standard Guide for Small-scaled Environmental Chamber Determinsations of Organic Emissions from Indoor Materials/ Products" at FORAY Laboratories - NATA Accreditation 1231. Test approved by CETEC on 16th March 2021.

VOC content: TVOC Emission of 0.049 mg/m3/hr for product applied on site is <0.5 mg/mg3/hr measured using test method for ASTM D5116- 2017 "Standard Guide for Small-scaled Environmental Chamber Determinisations of Organic Emissions from Indoor Materials/ Products" at FORAY Laboratories - NATA Accreditation 1231. Test approved by CETEC on 16th March 2021.
